Art Unit 1713

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over any one of Zipplies, U.S. Patent No. 5,216,068, Nakamura et al., U.S. Patent 4,370,436, Eberl, U.S. Patent No. 4,665,113 or Banham et al., U.S. Patent 3,882,217.

Each of these patents teaches the process of preparing granular polytetrafluoroethylene polymers which have polar group containing compounds within the polymers. See specifically Banham in the Abstract and columns 3 and 4, Eberl at column 2 and 3, Nakamura at columns 4 and 5 and Zipplies at columns 2-4. The

Art Unit 1713

Examiner maintains that each of these patents teaches the instantly claimed ingredients and discloses to one of ordinary skill in the art the process as instantly claimed. As such, the claims are seen to be anticipated.

In the event that one of ordinary skill in the art would not immediately envisage applicants' instantly claimed ingredients and the process for forming as instantly claimed, then the claimed process is rendered prima facie obvious given that the prior art discloses each of the instantly claimed ingredients and suggests to one of ordinary skill in the art that they be combined as claimed. As such, one of ordinary skill in the art would find it prima facie obvious to prepare a polytetrafluoroethylene composition as claimed.
